INDUSTRIAL COMPONENT HEATERS

Immersion Heaters

OMEGA offers a wide variety of heaters for heating gases liquids and soft metals by direct immersion. 24 hour delivery is available on over 260 models; 2-3 week delivery on over 6000 models. Standard units in incoloy copper, steel and stainless. Custom units in 10 different sheath materials. Write for Catalog

Pipe Thread Heaters

- Used in low KW, low pressure applications
- 18 options available including liquidproof or explosion-resistant outlet boxes and integral thermostats.
- UL and CSA listed

Pipe Flange Heaters

- Used in higher KW high pressure/temperature applications
- Standard sizes up to 12' flanges, custom sizes up to 30".
- 23 options available including high pressure flanges, built-in thermostats, liquidproof or explosion-resistant outlet boxes

Over-the-Side Heaters

- Used when heater cannot penetrate vessel wall or where heater must be moved frequently.
- Optional constructions; curved blades for circular openings, deep tank construction and vertical design for minimal interference.
- 13 options available: including built-in thermostat, explosion-resistant outlet boxes, cord and plug.

Cooling Tower Heaters

- Specially designed pipe thread heaters to prevent water in cooling tower basins or sumps from freezing
- Over-the-side designs also available.
- Remote thermostats, contactors, low water cutoff and NEMA 4 panels available.
- UL listed

Special Designs

- Designed for special user and OEM applications.
- Examples: Pipe insert heaters for viscous fluids, rectangular flange heaters for food processing and many more

Bottom Mounted Heaters

Used in coffee urns, steam tables or any job requiring a low profile. Options; Low water cutoff, liquidproof, explosion resistant outlet boxes.
